About me

I'm a dedicated Software Engineer, driven by a strong passion for developing innovative programs that enhance organizational efficiency and success. With a demonstrated ability to lead, motivate, and educate teams, I excel in managing projects effectively. Known for my hardworking nature and enthusiasm, I approach tasks with self-motivation. I possess excellent interpersonal and communication skills, allowing me to easily collaborate and work with others. With these qualities, I am confident in my ability to make a positive impact and contribute to the success of any organization.

Projects and Experience

Axonall - Travel Arrangements Solutions
Luxury Travel Project | Client Base | LIVE (MEARN, Java, Spring Boot , Sabre,Stripe)

Collect Mate - Automatic Card And Recovery Solutions
Industrial Bank Project | Client Base | LIVE (Java, Spring Boot ,Angular)

Financial Reconciliation Project VISA - MASTER CARDS
Industrial Bank Project | Client Base | LIVE (Java ,Spring Boot ,Angular)

E - Learning Management System - OpenAI and GeminiAI
Client Base Project (NextJS , Mongo DB, Node JS, Zod, Clerk, Mux ,Tailwind CSS)

Happy Tails - Pet Shelter Management System
Client Base Project (React JS, Express JS, Mongo DB, Node JS, Tailwind CSS)

Online Fuel Management System
University Project (java , Servlet , Html , Php , Bootstrap CSS)

FitLink Social Media Platform
University Project (Spring Boot , NextJS , Mongo DB, Tailwind CSS)

BODIMA Mobile Application Project
University Project (Kotlin, Firebase,)

Work Experience

AXONALL. PVT LTD | Travel Arrangements - London

Software Engineer | 2024 October - PRESENT
As a Software Engineer, I am spearheading the development of a comprehensive travel management platform using the MEARN stack and enterprise Java. My responsibilities include architecting scalable microservices with Spring Boot and Node.js, implementing secure RESTful APIs, and integrating cloud-native services on AWS.

BotMedFusion | Sheridan Wyoming - USA

Software Engineer | 2024 October - PRESENT
At BotMedFusion, I contribute to a telemedicine and patient management platform by developing robust full-stack modules using Node.js and Spring Boot for the backend and React/Next.js for the frontend. My work involves real-time data processing, secure API handling, and seamless user experiences for healthcare providers.

DMS Software Technologies | Colombo - Western Province

Associate Software Engineer | 2024 July - 2024 Sep |
Contributed to the development and optimization of software solutions, focusing on application engineering and program creation and enhance software infrastructure and ensure high-performance applications. Collaborated in a hybrid environment to meet project goals effectively.

EPIC LANKA PVT LTD | Battaramulla - Western Province

Associate Software Developer | 2024 January - 2024 July |
In this role, I actively develop and maintain financial solutions including card issuing and transaction systems. Using Java and Spring Boot, I design and implement REST APIs that handle critical banking operations. I also build and maintain Angular-based front-end modules aligned with modern UI/UX standards.

EPIC LANKA PVT LTD | Battaramulla - Western Province

Software Engineer Trainee | 2023 July - 2024 January |
As a trainee, I gained practical experience working on enterprise-grade banking software. I assisted in back-end development with Java and Spring Boot, wrote unit tests, and fixed bugs to improve code quality. I was introduced to Angular for front-end development and used Oracle databases for maintaining financial records.

BANK OF CEYLON | Kandy Branch - Central Province

Bank Trainee | 2018 JULY - 2019 - FEB |

Tools & Platforms

1. Sabre APIs (Hotels, Flights, Transport, Cruises, Private Jets)
2. Stripe (PaaS/SaaS Integrations)
3. Salesforce Marketing Cloud
4. Google Tag Manager
5. CRM Integrations (Zoho, Salesforce)
6. Admin Portals for Internal Ops

Development Skills

1. Full-Stack Web Development
2. API Design & Integration
3. Real-Time Data Handling
4. Form Validation & UX Handling
5. Payment Gateway Implementation
6. Responsive UI Development
7. Third-Party Service Integration
8. Secure Authentication Mechanisms

Cloud & DevOps

1. AWS (EC2, S3, RDS, Lambda)
2. Microsoft Azure (App Services, DevOps)
3. Firebase Hosting & Functions
4. GitHub Actions, Azure DevOps
5. Docker, CI/CD Pipelines, Postman, Swagger

Databases & Storage

1. Oracle, MySQL, PostgreSQL
2. MongoDB, Firebase Firestore
3. Amazon S3, Azure Blob Storage

Project & Team Tools

1. Git, GitHub, Bitbucket
2. Jira, Confluence, Notion, Slack
3. Visual Studio Code, IntelliJ IDEA, Postman

Development Practices & Strengths

1. Agile & Scrum-based Development
2. Test-Driven Development (TDD), Unit & Integration Testing
3. Performance Optimization & Lazy Loading
4. Secure Coding (OWASP practices, Auth flows)
5. Scalable Architecture & Clean Code Principles (SOLID, DRY, KISS)

Personal Interests

1. Exploring AI in Web & Mobile Applications
2. Technical Blogging & Developer Advocacy
3. Teaching, Mentoring, and Public Speaking
4. Cloud Architecture & DevOps Trends
5. Cycling, Hiking, and Nature Photography

Education

SRI LANKA INSTITUTE OF INFORMATION TECHNOLOGY
BSc (Hons) in Information Technology Specializing in Software Engineering
CGPA 3.6

SRI LANKA INTERNATIONAL BUDDHIST ACADEMY
Diploma In English | Grade - Superior A | December 2018 - June 2019
Currently Following IELTS

VIDYATRTHA COLLEGE KANDY
High School Education | Maths Stream | April 2004 - November 2020
Combined Mathematics - A | Physics B | Information Technology B

Research Project

CityVision: a Deep Learning Approach to Smart Cities
Research Project | NBQSA | Published Paper | 2024 | Grade Achieved: A
YOLOv8 |CNN |SVM |OpenCV | Python |NumPy| Pandas | Flask| AWS EC2 / S3
CityVision is an AI-driven smart surveillance system designed to enhance urban security using deep learning and real-time computer vision. The research focused on automating threat detection in city environments by analyzing live video streams and identifying suspicious human activities and unusual patterns. The project was also NBQSA nominated and later published as a research paper. Visit **CityVision**

Courses

AWS Academy Graduate - AWS Academy Cloud Foundations
Amazon Web Services | 2024 OCT - Issued

Microsoft Azure | AZ-900T00| AI | DevOps
Microsoft Azure | 2022 Jan - Issued

Microsoft Azure AI Fundementals | DevOps
Microsoft Azure | 2022 Jan - Issued

Microsoft Azure AZ-400 | DevOps
Microsoft Azure | 2022 Jan - Issued

CISCO CCNA V7 Router Configuration
Cisco | 2020 January - Issued

CISCO CyberOPS Associate
Cisco | 2023 July - Issued

Key Achievements & Contributions

- **Successfully integrated Sabre APIs in multi-modal travel booking platforms including flights, hotels, cruises, and private jets.**
- **Designed and developed Stripe-based PaaS/SaaS billing modules with seamless checkout, recurring billing, and finance dashboards.**
- **Led marketing tech integrations using Data Dog, Google Tag Manager,boosting event-driven tracking and analytics.**
- **Implemented CRM pipelines and automated campaigns via Salesforce Marketing Cloud and custom GTM triggers**
- **Developed secure internal admin portals for enterprise clients with RBAC, logging, and workflow management.**
- **Architected and deployed cloud-based full-stack solutions on AWS including containerized microservices.**
- **Automated CI/CD workflows using GitHub Actions, with integrated release notifications and error handling.**
